

Download Kardex Remstar Maintenance Manual

Kardex Remstar is a leading supplier of automated storage & retrieval solutions (ASRS) including vertical lift modules, vertical carousels, vertical buffer modules, and more. Kardex Remstar is a leading supplier of automated storage & retrieval solutions (ASRS) including vertical lift modules, vertical carousels, vertical buffer modules, and more. The ASRS automatic vertical shuttle lift module (VLM) provides high density compact storage with a larger storage capacity in a smaller footprint than static aisle shelving. The VLMs provide fast access to stored materials with automated processes that increase productivity, accuracy, and ergonomics all while saving floor space and a quick return on investment. Forklifts and materials handling for Portland, Oregon and all of Oregon and southern Washington state is handled by our Portland office at Raymond Handling Concepts Corporation.
